

TANSHEET ALI

Senior Full-Stack Software Engineer

Harlow, Essex, United Kingdom | 07538 721714 | tansheetali@gmail.com

LinkedIn: linkedin.com/in/tansheetalitaj | GitHub: github.com/tansheetalitaj | Portfolio: tansheetalitaj.github.io

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 10 years of commercial experience building and supporting web applications, backend services, REST APIs and system integrations. Strong across React, TypeScript, Node.js, PHP (Laravel, Symfony, CodeIgniter), MySQL and AWS. Experienced in taking features from requirements and architecture through development, testing, deployment and production support, with particular strength in API-led systems, workflow automation, business applications and modernising existing platforms. MSc Management with Data Analytics (BPP University, London).

KEY SKILLS

Languages: PHP, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, responsive web applications, component-based UI development

Backend: Node.js, Laravel, Symfony, CodeIgniter 4, Yii2, REST APIs, webhooks, queues, cron jobs, background processing

Databases: MySQL, MongoDB, relational database design, query optimisation, ETL, data imports and synchronisation

Cloud and DevOps: AWS (EC2, RDS, S3, CDK), Linux, CI/CD, Git, cloud deployment, production support

Testing and Quality: PHPUnit, Jest, Playwright, Postman, unit testing, integration testing, API testing, debugging, refactoring

Engineering Practices: OOP, MVC, authentication, role-based access control (RBAC), audit logging, secure APIs, Agile, Salesforce integration, PDF and Excel workflows, OCR and QR processing

PROFESSIONAL EXPERIENCE

Independent Software Engineer – Product and Open-Source Development

Self-employed | United Kingdom | May 2026 – Present

- Design and develop SaaS and web application projects using PHP (CodeIgniter 4), MySQL and JavaScript/TypeScript, covering backend workflows, API-driven features and user-facing functionality.
- Building a housing compliance and repair-management platform with authentication, role-based access control, audit logging, scheduled jobs, notifications, evidence management and reporting workflows.
- Develop reusable application components and API integrations, working across frontend, backend and relational data modelling with production-oriented engineering practices.
- Continue technical development through open-source and portfolio projects spanning full-stack architecture, automation and backend framework design.

Senior Software Engineer

Test Inc. | Essex, United Kingdom | Oct 2023 – Apr 2026

- Designed, developed and maintained business-critical full-stack applications, backend services, internal platforms and REST APIs using PHP, CodeIgniter 4, MySQL, JavaScript/TypeScript, Node.js, Python and AWS.
- Built integrations between internal applications and third-party platforms including SimPRO, ScheduleIT, Salesforce, EDIS and AppCan, connecting business workflows across multiple systems.
- Developed a secure customer portal with authentication, OTP verification, role-based permissions, audit logging and controlled access to customer features.
- Designed scheduled, cron and queue-based processing for asynchronous synchronisation, imports, retries and background jobs supporting reliable application workflows.
- Implemented data-processing features covering validation, transformation, reconciliation, PDF generation, re-synchronisation, Excel workflows, OCR and QR-code processing.
- Built capacity and scheduling functionality integrating ScheduleIT data into calendar-based operational workflows, and supported Salesforce-related data relationships.
- Delivered features end to end, from database and API design through application logic, user workflows, testing and production support.
- Investigated and resolved issues across frontend behaviour, backend code, APIs, databases and integrations; used PHPUnit, Jest, Playwright and Postman for automated and API testing.

Senior Software Engineer

Vision Plus Technologies | Lahore, Pakistan | Aug 2020 – Dec 2021

- Designed and developed full-stack web applications, backend services and RESTful APIs using PHP, Laravel, Node.js, MySQL and AWS.
- Built functionality for commercial web platforms and recruitment technology, covering data-driven workflows, API integrations and user-facing features.
- Designed relational database structures and backend logic; improved performance through SQL optimisation, refactoring and debugging.
- Contributed to application architecture, feature design, testing, releases and cloud-hosted deployment support across distributed development teams.
- Worked with stakeholders to translate product and business requirements into maintainable end-to-end software solutions.

Software Engineer

SixLogics | Lahore, Pakistan | Sep 2014 – Aug 2020

- Developed and maintained production web applications using PHP, Laravel, Symfony, Yii2, MySQL, JavaScript, HTML and CSS across commercial client projects.
- Implemented backend business logic, database-driven functionality, authentication, validation, REST APIs and third-party system integrations.
- Delivered frontend and backend features for data-driven web applications and supported international client work, including projects for Planet Sport.
- Designed and maintained MySQL schemas and queries; improved existing applications through debugging, refactoring and performance optimisation.
- Supported testing, deployments, production troubleshooting and ongoing maintenance across the software development lifecycle.
- Progressed over six years from individual feature delivery to independently owning substantial application features and end-to-end development tasks.

SELECTED PROJECTS

SuperNova Framework – Open-Source PHP MVC Framework: Designed an independent PHP MVC framework exploring routing, controllers, models, application configuration, reusable components and maintainable software architecture.

Enterprise Integrations and Workflow Automation: Delivered API-led integration and automation solutions involving scheduled processing, data transformation, validation, imports and exports, retry handling, audit logging and production troubleshooting.

EDUCATION

MSc Management with Data Analytics – BPP University, London, UK | 2022 – 2023

BSc Computer Science – COMSATS Institute of Information Technology, Pakistan | 2010 – 2014

ADDITIONAL INFORMATION

- Experience working with UK-based organisations and international clients across the full software development lifecycle.
